

ABSTRACT OF THE DISCLOSURE

1 A convertible cargo bed cover can function as both a tonneau cover and a
2 cargo bed cap. The cover is raised by motorized elements to be substantially
3 aligned with a roof of a passenger cabin of the vehicle. Side and rear window
4 panels stored inside the cover can be installed to transform the cover to a cap to
5 enlarge available enclosed cargo space. Rear pillars are installed at the rear
6 corners of the tonneau cover in its raised position to complete the installation.
